## AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## LISTING OF CLAIMS:

1-13. (cancelled)

14. (new) Cooking assembly comprising:

a bath forming a cavity having an open top and able to take liquid, a bottom wall and a peripheral trough surrounding an upper edge of the bath; and

a heating means with heating elements situated outside the cavity, under the bottom wall for directly heating the bottom wall.

- 15. (new) Assembly according to Claim 14, further comprising accessories designed to be hooked over the upper edge of the bath.
- 16. (new) Assembly according to Claim 14, further comprising a removable support frame designed to be placed removably against the upper edge of the bath and equipped with hooking means for suspending at least one cooking basket.

Application No. 10/695,387 Reply to Office Action of September 22, 2004 Docket No. 0507-1060

- 17. (new) Assembly according to Claim 16, wherein the support frame comprises a peripheral skirt surrounding an internal peripheral wall of the peripheral trough when the support frame is placed on the upper edge of the bath.
- 18. (new) Assembly according to Claim 16, wherein the hooking means comprise strips arranged on an interior periphery of the support frame.
- 19. (new) Assembly according to claim 14, wherein the hooking means comprise at least one transverse strip dividing the support frame.
- 20. (new) Assembly according to Claim 19, wherein the one transverse strip is removable and rests on periphery strips.
- 21. (new) Assembly according to claim 14, further comprising a lid resting on the support frame, closing an upper opening of the cavity.
- 22. (new) Assembly according to claim 14, further comprising filtering means obstructing a drain for removing liquid contained in the cavity of the bath.

Application No. 10/695,387

Docket No. 0507-1060

- 23. (new) Assembly according to claim 14, further comprising a drain for the peripheral trough for removing a liquid present in the peripheral trough.
- 24. (new) Assembly according to claim 14, wherein the bottom wall of the bath is thicker than the side walls of the bath.
- 25. (new) Assembly according to Claim 15, further comprising a removable support frame designed to be placed removably against the upper edge of the bath and equipped with hooking means for suspending at least one cooking basket.
- 26. (new) Assembly according to Claim 17, wherein the hooking means comprise strips arranged on an interior periphery of the support frame.
  - 27. (new) Cooking assembly comprising:

a bath forming a cavity having an open top and able to take liquid, a bottom wall and a peripheral trough surrounding an upper edge of the bath;

a heating means situated outside the cavity; and

- a removable support frame designed to be placed removably against the upper edge of the bath and hooking means for suspending at least one cooking basket.
  - 28. (new) Cooking assembly comprising:
- a bath forming a cavity open at the top to take liquid and equipped with heating means;
- a peripheral trough surrounding the upper edge of the bath;

heating elements situated outside the cavity; and

- a removable support frame removably placeable against the upper edge of the bath and equipped with hooking means for suspending at least one cooking basket.
- 29. (new) Assembly according to Claim 28, wherein the support frame comprises a peripheral skirt surrounding an internal peripheral wall of the peripheral trough.
- 30. (new) Assembly according to Claim 28, wherein the hooking means comprise strips arranged on an interior periphery of the support frame.
